Aerosol-Radiation UAV: Aug 09, 2008
Cloud Physics UAV data: Aug 09, 2008
Cloud Physics CDP data: Aug 09, 2008
Cloud Physics LWC data: Aug 09, 2008

The graph displays two plots related to cloud physics LWC (Liquid Water Content) data for Aug 09, 2008.

**LWC - Flag Plot:**
- The y-axis represents the LWC flag values, ranging from 0 to 1.
- The x-axis shows the day number, from 118.21 to 118.3.

**LWC (in mv) Plot:**
- The y-axis represents LWC values in microvolts (mv), ranging from 0 to 2 x 10^4.
- The x-axis shows the day number, from 118.21 to 118.3.

The data is represented using different markers for each channel:
- **1st channel** (blue dots)
- **2nd channel** (red dots)

The graphs highlight the changes in LWC over the specified period, with distinct patterns and values for each channel.
